# HALLOWEEN CRAFT Q-TIP SKELETON GUIDE

### What You'll Need:

- Black construction paper (one piece per person).
- Scissors (multiple kids scissors if you want them to do most of the cutting).
- Q-tips (10-16 Q-tips per skeleton, depending on how detailed you want to be).
- Paper plates (for glue).
- Glue, of course.
- Baby-wipes or damp paper towels (for clean up).

# What You'll Do To Set Up:

- 1. Print a copy of this Q-Tip Skeletal Guide: Skull & Labels (makes 9 Skeletons).
- 2. Cut out the individual skulls.
- 3. If you're ambitious or want to save time during the actual group activity, precut the sheet of bone & joint labels. Just be sure to keep each set of labels together. It may be easier to use a paper cutter (aka guillotine).
- 4. Display the INSRUCTION GUIDE and the model skeleton for everyone to follow.
- 5. Each person will get:
  - a. SKULL (cut-out).
  - b. Paper with the BONE & JOINT LABELS.
  - c. A piece of BLACK CONSTRUCTION PAPER.
  - d. A PAPER PLATE with a half-dollar size dab of GLUE.
  - e. SCISSORS.
  - f. Q-TIPS (10-16).
  - g. A baby wipe or damp paper towel.

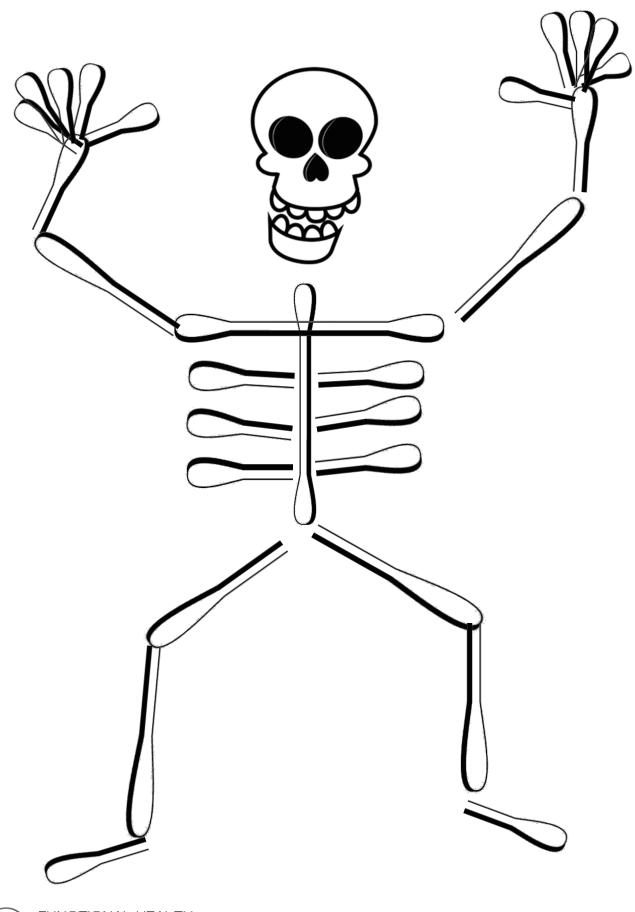

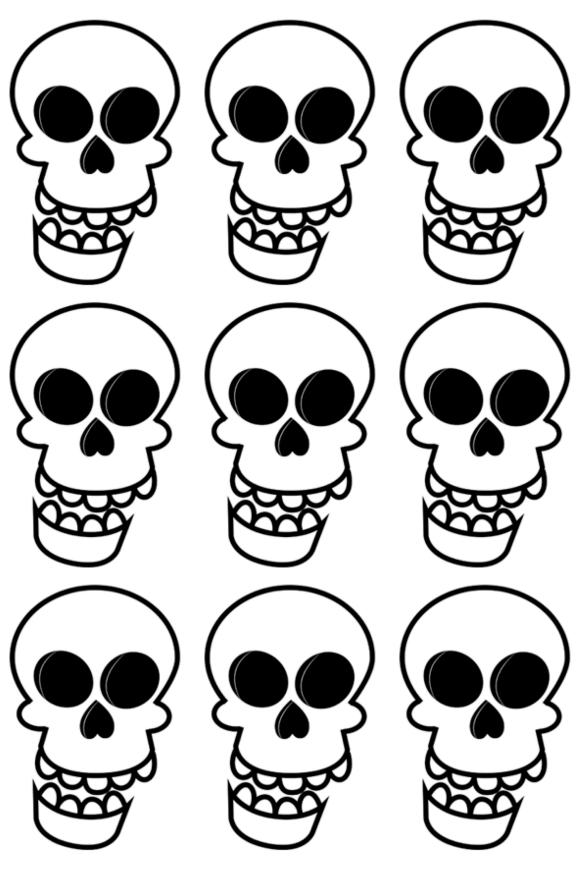

# **INSTRUCTION GUIDE**

- 1. Glue the skull to the top of your black construction paper.
- 2. Use your scissors to cut-out the labels.
- 3. Use your scissors to cut the Q-tips to make shorter segments.
- 4. Glue the Q-tips to the black construction paper to make the skeleton & bones.
- 5. Glue the labels onto the paper.
